The price is set by the host site, so costs may vary, but all have opportunities for scholarships

### Number of Follow-ups?

Introductory Consultation with follow-ups over the year.

**MARQUETTE UNIVERSITY**

**BE THE DIFFERENCE.**

### Overview

The Marquette Model (MM) uses urine fertility biomarkers collected at home that measure hormone levels. These biomarkers can be used in conjunction with cervical mucus or basal body temperature and an algorithm to confidently determine the woman's fertile window. Professional nurses are specially trained to teach the Marquette Model.
